

- BOP Drifts
- Vacuum Test Kit
- Hot Line & Panels
- Urethane Products
- Accumulators/HPU
- Hydraulic Test Bench
- BOP Fluid Quality
- Code 62 Fittings
- Signature Tester
- Stop Collars
- Lubricants

- Swivels
- Lubricants
- Umbilical Clamps
- Mux Clamps & Racks
- Cathodic Protection
- Riser Clamps
- Bumpers

- ROV Panels
- Subsea Valves
- Subsea Gauges
- Stabs & Receptacles
- SPM Valves & Manifolds
- Cathodic Protection
- Code 62 Fittings
- Lubricants

Hydraulic Signature Tester

- High speed data acquisition
- Up to 8 channels
- Subsea deployable
- Portable kit, panel or Test Bench mounted

Subsea Gauges

- Off the shelf - most ranges in stock
- Calibrated and/or Subsea certified
- 2.5", 3.5" and 4.5" dial sizes
- Panel and stem mount

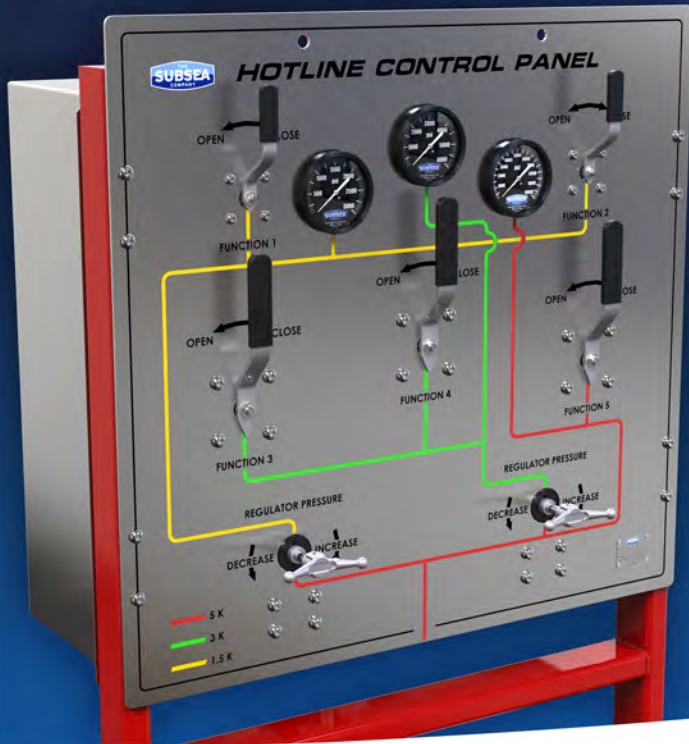

BOP Drifts

- Widest selection of standard designs available
- Multiple sizes, weights and configurations
- Pad eye and most drill pipe connections
- Shipping and storage containers

Test Panels

- Standard 5K Conduit and 15K Choke & Kill
- 1/2" SS plate, front mounted components and plumbing
- Offset valve design for simple replacement
- Easily operated and serviced

Hotline Control Panel

- 5K Inlet
- 2 regulated circuits
- 1 full pressure circuit
- 1/2" and 1" flow paths
- 5 test circuits

Hydraulic Test Bench

- Modular design
- Mechanical or digital recording
- Cycle testing
- Universal or BOP specific manifolds

Lubricants

- Superior anti-seize and corrosion control
- Extreme pressure performance
- Eco-friendly
- Convenient packaging

High Pressure Swivels

- 3,000 to 15,000 PSI working pressure
- Low torque under full pressure
- Hydraulic and mud service
- API standard connections
- Field serviceable and repairable

Vacuum Test Kit

- Compact portable system
- Rugged storage and shipping containers
- Simple set-up and operation
- Reliable components and accessories
- High accuracy electronics

BOP Fluid Quality

- Filtering and recirculation
- UV conditioning
- pH and conductivity monitoring
- ISO and NAS particle reporting

Cathodic Protection

- Riser and BOP applications
- Simple, economical designs
- Easy to install
- ROV replaceable versions

Buoyancy Stop Collars

- Composite or steel construction
- Prevents equipment over travel
- Reduces floatation movement
- Improves safety
- Reduces damage

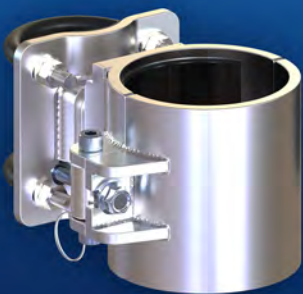

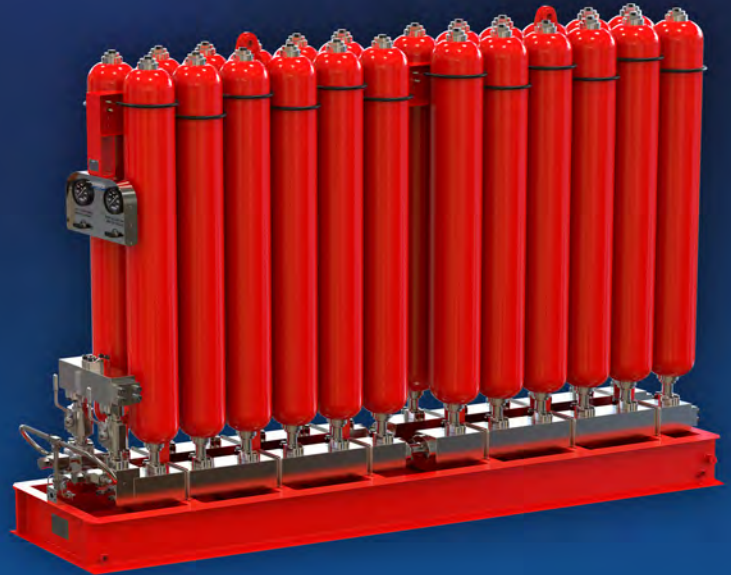

Urethane Products

- Bumpers
- Spacers
- Pin & Box protection
- Clamping and retaining

Accumulator Racks

- Standard modular design
- SS manifolds, piping and valves
- ABS, CDS and DNV specifications
- High spec framework and painting

Umbilical Clamps

- Stainless steel or composite
- Single or dual lines
- Rapid fabrication
- Customized mounting

Riser Clamps

- Drilling and Production applications
- Steel, stainless and composite construction
- Floatation load sharing
- Thrust Collars

Mux Clamps

- Rugged and reliable clamping or retaining
- Stainless steel and retractable
- Composite high strength and lightweight

Clamp Racks

- High density storage
- Reduce deployment times
- Hose reels and tool box
- High spec framework and paint

SPM Valves

- 5K MWP - 1/2", 1" and 1-1/2" sizes
- Corrosion resistant materials
- Suitable for Subsea service
- Improved performance and reliability

SPM Manifolds

- Standard or custom
- Rapid design and approval process
- 100% corrosion resistant material
- High, medium and low flow

Code 62 Fittings

- Standard and seal sub designs
- Custom configurations quickly machined
- 316SS or specialty alloys as required
- Competitive pricing

ROV Panel Components

- ROV stabs and receptacles
- Single or dual port
- ROV operable valves
- Gauge assemblies
- High flow available

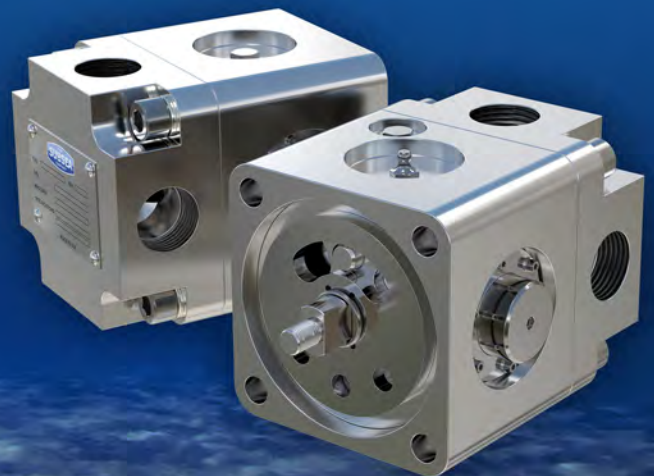

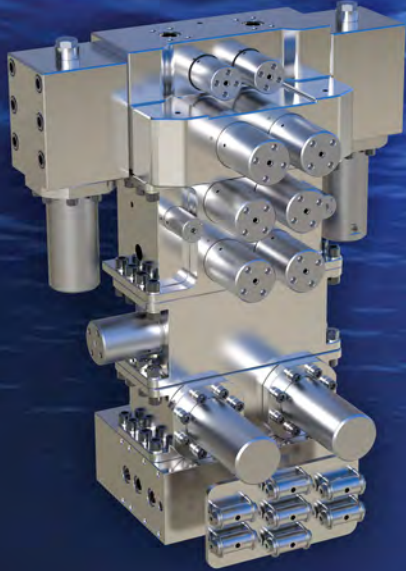

ROV Panels

- Standard 316SS plate size
- Rapid design and approval process
- Quick deliveries
- Competitive pricing

Subsea Valve

- 3 position 4-way valve
- 5K & 6K MWP
- High flow
- Long lasting wear parts
- Corrosion resistant material

Rigid Conduit Manifold

- Rapid design and approval
- 3D Modeling
- Competitive price and delivery
- Configured to your design

Subsea Signature Tester

- Up to 8 channels of data
- Laptop programmable
- Event Triggered
- Continuous or stored data

Flanges

- Standard API
- Blind and Test
- Swivel flanges
- Weld neck

Who We Are

We are a manufacturer of subsea related products with a proven track record of satisfying our customers operational needs through collaborative innovation drawn from our subsea experience and the clients subsea professionals. Our primary focus is on products related to marine riser, blowout preventer stacks and subsea controls.

Vision/Mission

Provide the Deepwater Drilling Industry with innovative, user friendly and reliable subsea equipment that satisfies current operational needs, improves safety, performance and runtimes while reducing downtime.

Strategy for Growth

- Offer industry innovative alternatives to increase efficiencies and safety during subsea related operations
- Provide unequaled customer service

Innovating Tomorrow's Standards

Raising the bar with innovative solutions worth sharing, The Subsea Company has significant experience in developing equipment to minimize risk, solve downtime issues and improve subsea operations and safety.

Our mission is to develop, manufacture and provide reliable market driven subsea products, equipment, and systems used in the offshore drilling and production industry. We strive to help our customers become successful by delivering customized solutions, when they need it the most.
